

# Party Chat Agent – User Scope Document

## 1. Introduction

The Party Chat Agent is a conversational AI integrated into the Party App to guide and engage nightlife users across Dubai, Tokyo, London, and Melbourne. Acting as a personal nightlife companion, it provides real-time assistance, recommendations, map navigation, and interactive features based on user preferences, behaviors, and cultural contexts.

---

## 2. Objectives

- **Personal Concierge:** Help users explore nightlife events seamlessly through natural chat.
  - **Personalization:** Adapt to each user's city, vibe, cultural interests, and social behavior.
  - **Engagement:** Encourage users to discover, attend, and share nightlife moments through conversational nudges.
  - **Safety & Convenience:** Provide crowd updates, safe navigation, and privacy-aware controls.
- 

## 3. Core Capabilities for Users

### 3.1 Event Discovery

- Conversational event search ("Find me a techno rave tonight in London").
- Mood-based suggestions ("Show me something chill near me").
- Culturally adaptive recommendations:
  - **Dubai** → VIP and luxury events.
  - **Tokyo** → youth-driven afterparties, anime/EDM nights.
  - **London** → underground raves, alternative vibes.
  - **Melbourne** → multicultural community festivals.

### 3.2 Party Map Navigator

- Real-time event map guidance via chat.
- Contextual recommendations ("There's a high-energy event 2km away").
- Mood icons and filters surfaced through conversation.
- Stealth mode toggle via chat command to hide user location.

### 3.3 Social Companion

- Suggest afterparties when an event ends.

- Share RSVP/attendance status of friends.
- Support for privacy (“Hide me from my friends tonight”).

### 3.4 Gamification & Engagement

- Chat-based notifications when users unlock badges or profile frames.
- Recap nudges (“Want me to build your Night Recap now?”).
- Friendly motivational prompts (“Your favorite DJ just announced a secret set nearby!”).

### 3.5 Night Recap Assistant

- Curate and organize photos/videos.
- Suggest creative captions and background music.
- Add venue branding or special effects.
- Enable group recap collaboration via chat prompts.

### 3.6 Real-Time Support

- Crowd updates (“Queue time at Club XYZ is 15 minutes”).
- Safety nudges (“It looks crowded here, want me to suggest a chill spot nearby?”).
- Nearby safe ride suggestions (integrated with maps).

---

## 4. Sample User–Agent Dialogues

### Event Discovery

**User:** “What’s happening in Tokyo tonight?”

**Agent:** “Tokyo is buzzing 🌸 🎧 — 12 events near you:

- Anime-themed EDM @ Shibuya
  - Chill rooftop lounge @ Roppongi
  - Student afterparty @ Shinjuku
- Want me to sort them by vibe or distance?”

**User:** “Show me the wild ones.”

**Agent:** “Say no more 🕺 🔥 — these 3 are high-energy:

1. Neon Techno Rave @ Shibuya (11 PM)
  2. Tokyo Bass Festival @ Odaiba (10 PM)
  3. Secret Trap Party @ Shinjuku (midnight)
- Should I pin the closest one on your Party Map?”

---

## Party Map Navigation

**User:** "What's around me right now?"

**Agent:** "Let's see... you've got:

- Chill Jazz Night 🍷 just 500m away
  - High-energy EDM ⚡ 1.2 km away
  - Food & Music Street Festival 🍔 🎵 2 km away
- Which one feels right for tonight's mood?"

---

## Afterparty Companion

**User:** "I'm not ready to go home yet."

**Agent:** "Love the energy! 🔥 There's an afterparty 8 minutes away with live DJs and no entry fee. Want me to add it to your Party Map?"

---

## Social Mode

**User:** "Are my friends going out tonight?"

**Agent:** "Yep 🎉 — Aki is at a rooftop lounge in Roppongi, and Mei just RSVP'd for a Shibuya EDM set. Want me to send you their event links?"

**User:** "Nah, I want to stay low-key tonight."

**Agent:** "Understood 😊 — stealth mode on. Your activity is now hidden until you switch back."

---

## Gamification & Engagement

**User:** "What's new with my profile?"

**Agent:** "Congrats! 🏆 You just hit 'Tokyo Explorer' level by attending 5 events in different districts. Want a sneak peek at your next unlockable badge?"

---

## Night Recap

**User:** “Can you make me a recap from last night?”

**Agent:** “Sure thing 📸 — I found 18 photos and 4 videos. Want me to style it as:

- Wild Night 🕺
  - Tokyo Rave 🎧
  - Chill Memories 🌙”
- 

### Safety & Real-Time Support

**User:** “How crowded is Club XYZ?”

**Agent:** “Pretty packed 🟡 — current queue is ~30 minutes. Want me to suggest a less crowded option nearby?”

**User:** “Yeah, show me something chill.”

**Agent:** “Done ✅ — there’s a lounge 1 km away, currently at 40% capacity. Music: deep house. Should I guide you there?”

---

### 5. Benefits for Users

- **Frictionless discovery:** Events surfaced through natural chat, not endless scrolling.
- **Smarter navigation:** AI-powered Party Map filtering by vibe, distance, and culture.
- **Memorable nights:** Recaps, badges, and gamification drive engagement.
- **Safe partying:** Real-time crowd insights, stealth mode, and safe-ride nudges.
