

Nightride App

Infrastructure & Server Requirements

Prepared for: Nightride / RISE AI | Date: May 2026

1. Overview

The Nightride platform consists of four components that require infrastructure planning:

Component	Type	Hosting
Mobile App (Flutter)	iOS & Android	App Store / Google Play
AI Chat Backend (Python)	Server	VPS / Cloud — must purchase
Web Admin Panel (Next.js)	Web	Firebase Hosting
Database & Authentication	Cloud	Firebase (Google)

2. Servers to Purchase

2.1 AI Backend Server (Required)

This is the core server that runs the Nightride AI chat agent. It processes all user messages, connects to Claude AI, and fetches live event data from Firestore.

Minimum Specifications:

CPU	2 vCPU cores
RAM	4 GB
Storage	40 GB SSD
OS	Ubuntu 22.04 LTS
Network	1 Gbps / 3 TB monthly transfer

Recommended Providers:

Provider	Plan	Monthly Cost	Region
Hetzner Cloud ★ Recommended	CX22	~\$6 / €4.35	EU Frankfurt
DigitalOcean	Basic Droplet	~\$24	EU Amsterdam

Google Cloud	e2-medium	~\$25	EU / Asia
AWS EC2	t3.medium	~\$30	EU Frankfurt
★ Recommendation: Hetzner CX22 — best value, enterprise-grade hardware, low latency to Dubai, London, Tokyo and Melbourne.			

2.2 Domain Name (Required)

A custom domain is needed to point to the backend server (e.g. api.nightride.app).

Provider	Cost / Year	Extras
Cloudflare (Recommended)	~\$10	Free DDoS protection + SSL
Namecheap	~\$12	Basic DNS management

3. Third-Party Services (Already Integrated)

These services are cloud-based and already connected to the app. No additional server purchase is needed — costs are usage-based.

Service	Purpose	Est. Monthly Cost
Firebase (Google)	Database, Auth, Chat History	\$0–\$50
Anthropic Claude API	AI chat brain (Claude Sonnet)	\$30–\$100
Ticketmaster API	Live events — 18 countries	Free tier / Commercial
Mapbox	Maps & location features	\$0–\$25

4. Monthly Cost Summary

MVP / Startup Stage

Item	Cost / Month
VPS Server (Hetzner CX22)	\$6
Domain Name	\$1
Anthropic Claude API	\$30–50
Firebase (Blaze plan)	\$10–30
Ticketmaster API	Free
Mapbox	Free
Total	~\$47–87 / month

At Scale (10,000+ Active Users)

Item	Cost / Month
VPS Server (4 vCPU / 8 GB)	\$30–50
Domain + SSL + CDN	\$5
Anthropic Claude API	\$150–300
Firebase (Blaze plan)	\$50–150
Ticketmaster Commercial License	TBD
Mapbox	\$25–100
Total	~\$260–600 / month

5. Target Markets

City	Country	Ticketmaster Coverage
Dubai	UAE	Yes (AE)
Tokyo	Japan	Yes (JP)
London	UK	Yes (GB)
Melbourne	Australia	Yes (AU)

6. Deployment Architecture

Mobile App (iOS / Android)

- HTTPS

▼

VPS Backend Server ■■■ Anthropic Claude API (AI brain)
(FastAPI + Agent) ■■■ Firebase Firestore (database)
■■■ Ticketmaster API (live events)

7. Immediate Next Steps

#	Action	Priority
1	Purchase VPS — Hetzner CX22 or DigitalOcean Droplet	High
2	Register domain via Cloudflare	High
3	Deploy backend to VPS (Nightride/Agent/ folder)	High
4	Update Flutter app BACKEND_URL to new domain	High
5	Upgrade Firebase to Blaze plan before launch	Medium

6	Apply for Ticketmaster commercial API license	Medium
